BUSINESS TECHNOLOGIES

Southeastern Tech's Business Technologies programs are designed to prepare the student for entry-level positions in business, industry, and government. Responding to the needs of the growing business community, the Business Technologies degree, diploma and certificate programs combine academic theory with practical training using state-of-the-art equipment.

As with all Southeastern Tech programs, students interested in Business Technologies programs should consult the Admissions Office to discuss program admission requirements and entry dates.

GENERAL EDUCATION CORE COMPETENCIES

The overall goal of a college education is to help students become productive citizens. The General Education core contributes to this concept by providing a variety of learning experiences which ensure that graduates are intellectually prepared for lifelong learning.

STC has identified the following general education core competencies that graduates will attain.

- The ability to utilize standard written English.
- The ability to solve practical mathematical problems.
- The ability to read, analyze, and interpret information.

CAPSTONE COURSES

An integral part of a student's education as they move through a given program of study is the ability to transfer and apply knowledge to the workplace. As a key component of degree, diploma and select technical certificates, capstone courses have been identified which include any of the following: a specific exit exam, project, portfolio, or skills check-off, etc. measuring student knowledge. When students are able to pass the exit assessment, they demonstrate they have retained knowledge throughout their program of study which will carry over to their chosen career. Students who do not pass the exit assessment will not be able to graduate and the capstone course will need to be repeated and passed along with the exit assessment.

In instances in which a student transfers from another college (having taken a course there-which is a capstone course here) into the same program at STC, they will need to complete STC's program exit assessment. This will be a requirement before credit for the course is given. In cases in which a student transfers from another college that has a capstone course for same program, the student will need to take the exit assessment for STC's designated capstone course. Students who do not pass this assessment will not be able to graduate and the capstone course will need to be repeated and passed along with the exit assessment.

For any questions regarding STC's capstone courses, please see your program advisor.

Accounting Associate of Applied Science Degree Program Major Code AC13

The Accounting Associate Degree program is a sequence of courses that prepares students for careers in today's technology-driven workplaces. Learning opportunities develop academic, technical, and professional knowledge and skills required for job acquisition, retention, and advancement. Students obtaining an accounting associates degree will be able to enter the work force as accountants with the skills necessary to handle financial accounting tasks such as maintaining a set of books for business entities, account classifications, subsidiary record accounting, fixed and intangible assets, current and long-term liabilities, partnerships, corporations, long-term liabilities. They will also be able to handle managerial accounting tasks such as financial statement analysis, job costing, cost behavior and cost-volume-profit analysis budgets, capital investment analysis, accounting for payroll, using computerized accounting systems, using spreadsheets for accounting applications, and income tax preparation.

EMPLOYMENT OPPORTUNITIES

Students obtaining an Accounting Degree will be able to enter the work force as accounting technicians with financial recordkeeping responsibilities. More experience can lead to jobs like accounts receivable or accounts payable clerk, payroll clerk or bookkeeper. Students will be able to assist in completing the full accounting cycle, payroll processing, individual income tax return preparation, application of professional ethics in the workplace, and utilize technological resources in the accounting field.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;
- Submit an official copy of your high school transcript or high school equivalent scores;
- Submit official college transcripts, if applicable;
- Meet the following assessment requirements:

Test	Reading	Writing	Numerical	Algebra

Business Technology Associate of Applied Science Degree Program
Major Code BA23
(Formally Business Administrative Technology)

The Business Technology degree program is designed to prepare graduates for employment in a variety of positions in today's technology-driven workplaces. The Business Technology degree program provides learning opportunities which introduce, develop, and reinforce academic and occupational knowledge, skills, and attitudes required for job acquisition, retention, and advancement. The program emphasizes the use of word processing, spreadsheet, presentation, and database applications software. Students are also introduced to accounting fundamentals, electronic communications, internet research, and electronic file management. The program includes instruction in effective communication skills and technology innovations for the office. Additionally, the program provides opportunities to upgrade present knowledge and skills or retrain in the area of administrative technology. Graduates of the program receive a Business Technology, Associate of Applied Science degree.

EMPLOYMENT OPPORTUNITIES

The Business Technology degree program is designed to produce graduates who are prepared for employment in a variety of positions in administrative and business fields.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;
- Submit an official copy of your high school transcript or high school equivalent scores;

Business Management Associate of Applied Science Degree Program ***Major Code MD13***

The Business Management program is designed to prepare students for entry into management and supervisory occupations in a variety of businesses and industries. Learning opportunities will introduce, develop, and reinforce academic and occupational knowledge, skills, and attitudes required for job acquisition, retention, and advancement in management. Graduates of the program receive a Business Management degree with a specialization in General Management or Human Resource Management.

According to the Occupational Outlook Handbook, many managers have a Bachelor's or Master's degree in Business Administration or some specialized field. Many organizations fill their top executive positions by promoting from lower levels as job openings arise. Even workers without a college degree may find themselves rising through the ranks over years of advancement in a company. Overall, the management field is growing, but the opportunities in the industry are increasingly more competitive.

The Business Management area offers degrees with specializations in General Management and Human Resource Management as well as diplomas with a General Specialization. These specialty areas combined with various general core courses determine the completion of the degree or diploma. Opportunities for continual educational growth may be pursued at the university level. Collegiate programs in the School of Business with a major in Management are available to those individuals wishing to obtain a Bachelor of Science or a Bachelor of Arts in this dynamic career field.

A manager is one who supervises others, decides the daily priorities of the business or office, delegates projects, and coordinates teams to meet the goals of the organization. Managers must have persuasive and clear communication skills, analytical minds able to digest large amounts of data quickly, and the skill to evaluate complex relationships among numerous factors. Additionally, managers exhibit personal qualities such as leadership, flexibility, self-confidence motivation, determination, and sound business judgment.

EMPLOYMENT OPPORTUNITIES

Business Management students have a wide variety of jobs to select from such as: small business management, retail management, management trainees, supervisory trainees, and entrepreneurship opportunities. The Bureau of Labor Statistics forecasts a 10.57% increase in management, business, and financial occupations between 2008 and 2018. Job prospects are stronger in high-growth industries such as health services and with managers with experience in international economics and marketing who are able to work across national and cultural borders. Competition for jobs is keen.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;
- Submit an official copy of your high school transcript or high school equivalent scores;
- Submit official college transcripts, if applicable;
- Meet the following assessment requirements:

Computer Information Systems Associate of Applied Science Degree Program Major Code CS23

COMPUTER SUPPORT SPECIALIST

The Computer Support Specialist program is a sequence of courses designed to provide students with an understanding of the concepts, principles, and techniques required in computer information processing. Graduates are to be competent in the general areas of humanities or fine arts, social or behavioral sciences, and natural sciences or mathematics, as well as in the technical areas of computer terminology and concepts, program design and development, and computer networking. Program graduates are qualified for employment as computer support specialists.

EMPLOYMENT OPPORTUNITIES

Computer Information Systems associate degree graduates are capable of performing many different types of jobs. Job opportunities exist in the areas of computer hardware and software sales, installation and repair, computer programming, computer networking, software and technical support, and web site design.

LICENSURE

Although certification is not required for employment, each of the Computer Information Systems associate degree programs provide the knowledge and skills for students interested in various information technology certifications.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;
- Submit an official copy of your high school transcript or high school equivalent scores;
- Submit official college transcripts, if applicable;
- Meet the following assessment requirements:

VIDALIA CAMPUS

Computer Information Systems Associate of Applied Science Degree Program

Major Code IS53

WEB SITE DESIGN

The Computer Information Systems Web Site Design program is a sequence of courses designed to provide students with an understanding of the concepts, principles, and techniques required in computer information processing. Graduates are to be competent in the general areas of humanities or fine arts, social or behavioral sciences, and natural sciences or mathematics, as well as in the technical areas of computer terminology and concepts, program design and development, and computer networking. Program graduates are qualified for employment as Web Site Designers.

EMPLOYMENT OPPORTUNITIES

Web Site Design Degree graduates are capable of obtaining Web/Multimedia Management and Webmaster occupations. The program prepares individuals to develop and maintain web sites and to host web pages at one or a group of web sites, and to function as designated webmasters. Includes web page design and editing; information resources management; web policy and procedures; Internet applications of information systems security; user interfacing and usability research; and relevant management and communications skills.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;
- Submit an official copy of your high school transcript or high school equivalent scores;
- Submit official college transcripts, if applicable;
- Meet the following assessment requirements:

Test	Reading	Writing	Numerical	Algebra

Accounting Diploma Program ***Major Code AC12***

The Accounting program is a sequence of courses designed to prepare students for today's technology-driven workplaces. Learning opportunities develop academic, technical, and professional knowledge and skills required for job acquisition, retention, and advancement. The program emphasizes a combination of accounting theory and practical application necessary for successful employment using both manual and computerized accounting systems. Program graduates receive an Accounting diploma.

EMPLOYMENT OPPORTUNITIES

Students obtaining an Accounting Diploma will be able to enter the work force as accounting technicians with financial recordkeeping responsibilities. More experience can lead to jobs like accounts receivable or accounts payable clerk, payroll clerk or bookkeeper. Students will be able to assist in completing the full accounting cycle, payroll processing, individual income tax return preparation, application of professional ethics in the workplace, and utilize technological resources in the accounting field.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;
- Submit an official copy of your high school transcript or high school equivalent scores;
- Submit official college transcripts, if applicable;
- Meet the following assessment requirements:

Test	Reading	Writing	Numerical	Algebra
ACCUPLACER	55	60	34

Business Management Diploma Program

Major Code MD12

The Business Management program is designed to prepare students for entry into management positions in a variety of businesses and industries. Learning opportunities will introduce, develop, and reinforce academic and occupational knowledge, skills, and attitudes required for job acquisition, retention, and advancement in management. Graduates of the program receive a Business Management diploma with a specialization in General Management.

According to the Occupational Outlook Handbook, many managers have a Bachelor's or Master's degree in Business Administration or some specialized field. Many organizations fill their top executives by promoting from lower levels as job openings arise. Even workers without a college degree may find themselves rising through the ranks over years of advancement in a company. Overall, the management field is growing, but the opportunities in the industry are increasingly more competitive.

The Business Management area offers a diploma with a specialization in General Management. This specialty area combined with general core courses determines the completion of the diploma. Opportunities for continual educational growth may be pursued in a degree at the technical college as well as the university level. Collegiate programs in the School of Business with a major in Management are available to those individuals wishing to obtain a Bachelor of Science or a Bachelor of Arts in this dynamic career field.

A manager is one who supervises others, decides the daily priorities of the business or office, delegates projects, and coordinates teams to meet the goals of the organization. Managers must have persuasive and clear communication skills, analytical minds, able to digest large amounts of data quickly, and the skill to evaluate complex relationships among numerous factors. Additionally, managers exhibit personal qualities such as leadership, flexibility, self-confidence, motivation, determination, and sound business judgment.

EMPLOYMENT OPPORTUNITIES

Business Management students have a wide variety of jobs to select from such as: small business management, retail management, management trainees, supervisory trainees, and entrepreneurship opportunities.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;

Human Resource Management Specialist Certificate ***Major Code HRMI***

The Human Resource Management Specialist Certificate prepares individuals to perform human resources functions in the HR Department in most companies. Learning opportunities will introduce, develop and reinforce students' knowledge, skills and attitudes required for job acquisition, retention and advancement in management. Graduates will receive a Human Resources Management Specialist TCC.

According to the Occupational Outlook Handbook of the Bureau of Labor Statistics, human resources specialists coordinate the recruitment, hiring, and training of new employees as well as benefits administration and labor relations. Employment is expected to grow much faster than the average for all human resources, training, and labor relations managers and specialist occupations. College graduates and those who have earned certification should have the best job opportunities. Competition for these positions can be very competitive and management education can provide a competitive edge.

Students interested in continuing their education and advance their careers may continue their education at the technical college level in the Business Management program. Students may pursue an associate degree or diploma in Business Management. Opportunities for continual educational growth may be pursued at the university level. Collegiate programs in the School of Business with a major in Management are available to those students wishing to obtain a Bachelor of Science or a Bachelor of Arts in their chosen field or industry.

Human resource personnel perform administrative activities related to hiring, training, benefits coordination, and labor relations for the organization. Supervisors and managers in this field require strong interpersonal skills. They must have clear and persuasive communication skills, analytical minds, and the skill to evaluate complex relationships among numerous factors. Dealing with people is an important part of the job.

EMPLOYMENT OPPORTUNITIES

Human Resource Specialist graduates have a wide variety of jobs to select from such as: small business management, retail management, human resource specialist, management trainees, and supervisory trainees. Among industries, firms involved in management, consulting, and employment services should offer many job opportunities, as businesses increasingly contract out human resources functions or hire human resources specialists on a temporary basis to deal with increasing costs and complexity of training and development programs. Demand for specialists also should increase in outsourcing firms that develop and administer complex employee benefits and compensation packages for other organizations.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;
- Submit an official copy of your high school transcript or high school equivalent scores;
- Submit official college transcripts, if applicable;
- Meet the following assessment requirements:

Test	Reading	Writing	Numerical	Algebra
ACCUPLACER	55	60	34

Management and Leadership Specialist Certificate ***Major Code MALI***

The Management/Leadership Specialist Certificate prepares individuals to become supervisors and leaders in business, commercial or manufacturing facilities. Learning opportunities will introduce, develop and reinforce students' knowledge, skills and attitudes required for job acquisition, retention and advancement in management. Graduates will receive a Management/Leadership Specialist TCC.

According to the Occupational Outlook Handbook of the Bureau of Labor Statistics, job opportunities for Management/Leadership Specialist will grow as fast as the average. Keen competition is expected for jobs as the number of applicants greatly exceeds the number of job openings. College graduates and those who have earned certification should have the best job opportunities. Competition for these positions can be very competitive and management education can provide a competitive edge.

Students interested in continuing their education and advance their careers may continue their education at the technical college level in the Business Management program. Students may pursue an associate degree or diploma in Business Management. Opportunities for continual educational growth may be pursued at the university level. Collegiate programs in the School of Business with a major in Management are available to those students wishing to obtain a Bachelor of Science or a Bachelor of Arts in their chosen field or industry.

Management/Leadership Specialists perform the managerial function for the organization. Supervisors are the first line of management between hourly employees and management. Leaders in this field require good interpersonal skills. They must have clear and persuasive communication skills, analytical minds, and the skill to evaluate complex relationships among numerous factors. Dealing with people is an important part of the job.

EMPLOYMENT OPPORTUNITIES

Management/Leadership Specialist graduates have a wide variety of jobs to select from such as: small business management, management trainees, and supervisory trainees. While the Bureau of Labor Statistics expects employment to grow as fast as the average, applicants with management experience along with a college degree in industrial engineering, management, or a related field, will enjoy the best job prospects.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;

Supervisor/ Management Specialist Certificate ***Major Code SS31***

The Supervisor/Manager Specialist Certificate prepares individuals to become supervisors in business, commercial or manufacturing facilities. Learning opportunities will introduce, develop and reinforce students' knowledge, skills and attitudes required for job acquisition, retention and advancement in management. Graduates will receive a Supervisor/Manager Specialist TCC.

According to the Occupational Outlook Handbook of the Bureau of Labor Statistics, job opportunities for Supervisor/Manager Specialist will grow as fast as the average. Keen competition is expected for jobs as the number of applicants greatly exceeds the number of job openings. College graduates and those who have earned certification should have the best job opportunities. Competition for these positions can be very competitive and management education can provide a competitive edge.

Students interested in continuing their education and advance their careers may continue their education at the technical college level in the Business Management program. Students may pursue an associate degree or diploma in Business Management. Opportunities for continual educational growth may be pursued at the university level. Collegiate programs in the School of Business with a major in Management are available to those students wishing to obtain a Bachelor of Science or a Bachelor of Arts in their chosen field or industry.

Supervisor/Manager Specialists perform the managerial function for the organization. Supervisors are the first line of management between hourly employees and management. Supervisors and managers in this field require good interpersonal skills. They must have clear and persuasive communication skills, analytical minds, and the skill to evaluate complex relationships among numerous factors. Dealing with people is an important part of the job.

EMPLOYMENT OPPORTUNITIES

Supervisor/Management Specialist graduates have a wide variety of jobs to select from such as: small business management, retail management, management trainees, and supervisory trainees. While the Bureau of Labor Statistics expects employment to grow as fast as the average, applicants with management experience along with a college degree in industrial engineering, management, or a related field, will enjoy the best job prospects.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;
- Submit an official copy of your high school transcript or high school equivalent scores;
- Submit official college transcripts, if applicable;
- Meet the following assessment requirements:

Test	Reading	Writing	Numerical	Algebra
ACCUPLACER	55	60	34	
ASSET	38	37	32	
COMPASS	70	32	26

Technical Management Specialist Certificate ***Major Code TMS1***

The Technical Management Specialist Certificate is designed to build upon a student's previously achieved TCC, Diploma or Associate Degree and add the management component to their education. Learning opportunities will introduce, develop and reinforce students' knowledge, skills and attitudes required to work in the student's current area of expertise. Graduates will receive a Technical Management Specialist TCC.

According to the Occupational Outlook Handbook of the Bureau of Labor Statistics, management candidates coordinate the people and equipment involved in the organizational processes. Many organizations fill their management positions by hiring from within and promoting from lower levels as job openings arise. Competition for these positions can be very competitive and management education can provide a competitive edge.

Students interested in continuing their education and advance their careers may continue their education at the technical college level in the Business Management program. Students may pursue an associate degree or diploma in Business Management. Opportunities for continual educational growth may be pursued at the university level. Collegiate programs in the School of Business with a major in Management are available to those students wishing to obtain a Bachelor of Science or a Bachelor of Arts in their chosen field or industry.

A manager is one who supervises others, decides the daily priorities of the organization or office, delegates projects, and coordinates teams to meet the goals of the organization. Managers must have persuasive and clear communication skills, analytical minds, and the skill to evaluate complex relationships among numerous factors. Managers also should exhibit personal qualities such as leadership, determination, motivation, self-confidence, and sound business judgment.

EMPLOYMENT OPPORTUNITIES

Technical Management Specialist graduates have a wide variety of jobs to select from such as: small business management, retail management, management trainees, and supervisory trainees. While the Bureau of Labor Statistics expects employment to be sustained, applicants with management experience along with a college degree in industrial engineering, management, or a related field, will enjoy the best job prospects.

ADMISSIONS CRITERIA

- Submit a completed application and application fee;
- Be at least 16 years of age;
- Submit an official copy of your high school transcript or high school equivalent scores;
- Submit official college transcripts, if applicable;
- Meet the following assessment requirements:
